# Text Mining with R – Twitter Data Analysis<sup>1</sup>

Yanchang Zhao http://www.RDataMining.com

R and Data Mining Workshop for the Master of Business Analytics course, Deakin University, Melbourne

28 May 2015

<sup>&</sup>lt;sup>1</sup>Presented at AusDM 2014 (QUT, Brisbane) in Nov 2014 and at UJAT (Mexico) ∰ Sept 2014 ∢ 🥃 ▶

#### Introduction

**Extracting Tweets** 

Text Cleaning

Frequent Words and Associations

Word Cloud

Clustering

Topic Modelling

# Text Mining

- unstructured text data
- text categorization
- text clustering
- entity extraction
- sentiment analysis
- document summarization
- **•** . . .

# Text mining of Twitter data with R <sup>2</sup>

- 1. extract data from Twitter
- 2. clean extracted data and build a document-term matrix
- 3. find frequent words and associations
- 4. create a word cloud to visualize important words
- text clustering
- 6. topic modelling

Introduction

#### Retrieve Tweets

#### Retrieve recent tweets by @RDataMining

```
## Option 1: retrieve tweets from Twitter
library(twitteR)
tweets <- userTimeline("RDataMining", n = 3200)</pre>
```

```
## Option 2: download @RDataMining tweets from RDataMining.com
url <- "http://www.rdatamining.com/data/rdmTweets-201306.RData"
download.file(url, destfile = "./data/rdmTweets-201306.RData")</pre>
```

```
## load tweets into R
load(file = "./data/rdmTweets-201306.RData")
```

```
(n.tweet <- length(tweets))</pre>
## [1] 320
# convert tweets to a data frame
tweets.df <- twListToDF(tweets)</pre>
dim(tweets.df)
## [1] 320 14
for (i in c(1:2, 320)) {
    cat(paste0("[", i, "] "))
    writeLines(strwrap(tweets.df$text[i], 60))
## [1] Examples on calling Java code from R http://t.co/Yg1Aiv...
   [2] Simulating Map-Reduce in R for Big Data Analysis Using
## Flights Data http://t.co/uIAh6PgvQv via @rbloggers
## [320] An R Reference Card for Data Mining is now available on
## CRAN. It lists many useful R functions and packages for
## data mining applications.
```
